DETAILED ACTION

1. This action is responding to application papers filed on 6/9/2005, 12/31/2003, and 6/7/2004.

2. Claims 1-35 are pending in the application.

Specification

3. The use of the trademark JAVA and VISUAL BASIC has been noted in this application. It should be capitalized wherever it appears and be accompanied by the generic terminology.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

4. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The abstract contains "said" which should be avoided in line 6. Also the phrase (i.e. the invention relates), which can be implied, should be avoided.

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

> The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-35 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Per claims 1-35, it is unclear what the accessory means. It is interpreted as an accessory device.

Claim 15 contains the trademark/trade name JAVA and VISUAL BASIC. Where a trademark or trade name is used in a claim as a limitation to identify or describe a particular material or product, the claim does not comply with the requirements of 35 U.S.C. 112, second paragraph. See *Ex parte Simpson*, 218 USPQ 1020 (Bd. App. 1982). The claim scope is uncertain since the trademark or trade name cannot be used properly to identify any particular material or product. A trademark or trade name is used to identify a source of goods, and not the goods themselves. Thus, a trademark or trade name does not identify or describe the goods associated with the trademark or trade name. In the present case, the trademark/trade name is used to identify/describe JAVA and VISUAL BASIC and, accordingly, the identification/description is indefinite.

Claim Rejections - 35 USC § 101

7. 35 U.S.C. 101 reads as follows:

> Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions

and requirements of this title.

8. Claim 33 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claim 33 is non-statutory because it is directed to a "computer program product" without recitation of a computer or a computer-storage medium embodying the claimed computer program. The claimed program product is disembodied arrangement without creating any functional interrelationship, either as part of the stored data or as part of the computing processes performed by the computer ("acts") or the computer storage medium so as to enable the computer to perform the claimed program as recited. Therefore, the claim is non-statutory.

Claim Rejections - 35 USC § 102

9. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

10. Claims 1-6, 10-14, 19-28, and 32-35 are rejected under 35 U.S.C. 102(b) as being anticipated by Blow (WO 99/53621, published on 10/21/1999).

Per claim 1:

Blow discloses:

- an interface for providing a connection with an accessory (i.e. "attachment of the external accessory 102 through interface 112," page 4, lines 4-5)

-said accessory comprising a library for enabling said electronic device to use the accessory (i.e. "Accessory interface memory 118 contains the interface software needed for the mobile station 100 to functionally interact with the specific external accessory 102," page 6 lines 6-10)

-wherein the electronic device further comprises means for providing said library available to the electronic device (i.e. "mobile station controller 108 writes the accessory interface software into interface upload memory 106, where it is temporarily stored," page 6 lines 12-17).

Per claim 2:

Blow further discloses:

- an application programming interface, wherein the electronic device further comprises means for providing said application programming interface available to the electronic device (i.e. "all of the necessary routines to interact fully with the external accessory 102," page 6 lines 30-32).

Per claim 3:

Blow further discloses:
